I have contacted the publisher i.e. inXile Entertainment and was told that it contains all the content that was advertised in the game as well as the director's cut and that is incorrect. The dungeons contain all the content of the director's cut, but the witch's casters and the sorcerer's casters (they are separate spells) have not been included and this was not corrected. I think this is a disgrace to the community and i hope inXile Entertainment will correct this oversight as soon as possible, as the games does not have the content that is advertised. If anyone has a patch to fix this issue, please do email me or post it here. Thank you for your time and understanding. Morningside, UK

Bards Tale IV Director's Cut The Bards Tale IV is a semi-sequel to the PC action-RPG Bards Tale III: The Sword of Crytania, released in 2006. This game was announced at Quakecon in 2011, but was supposed to be a completely new game developed by FASA studios, but this was not actually true. In this game, the player can restore the New England kingdom of Protector.

If you really want to store all strings as key, then use map> > for better performance. If you want to convert it to vector of pairs (keys and values), then do something like this: map> new\_map; for(auto &p: map) { new\_map[p.first] = p.second; } std::vector>> new\_vect; new\_vect.reserve(map.size()); for(auto &p: map) { new\_ve 3e33713323
