Photoshop is a tool that can turn an ordinary photograph into a masterpiece. It is one of the most popular graphics editing programs in the world, and it comes pre-installed on computers with a digital camera. What

Relationship between
Th1/Th2 cytokines and
apoptosis in patients
with lupus nephritis.
To investigate the
association between
Th1/Th2 cytokines and
apoptosis in renal

tissue of patients with lupus nephritis and to elucidate their mechanism of pathogenesis. The study included 30 patients with lupus nephritis and 30 healthy controls. Expression levels of Th1/Th2 cytokines and

apoptosis-related proteins in renal biopsy specimens were examined using immunohistochemistry and Western blot analysis. The mRNA expressions of Th1/Th2 cytokines in peripheral blood mononuclear cells

(PBMCs) were detected by real-time quantitative polymerase chain reaction. Serum levels of Th1/Th2 cytokines were detected by enzyme-linked immunosorbent assay. Apoptosis of renal tissue and apoptosis-

related proteins were analyzed by terminal deoxynucleotidyl transferase-mediated deoxyuridine triphosphate nick-end labeling staining and Western blot analysis, respectively. Immunostaining results showed that

interleukin (IL)-2 and IL-10 were mainly expressed in macrophages and interferon- γ and IL-4 in lymphocytes. The protein expression of caspase-3 and Bax was strong, and the expression of Bcl-2 was weak in patients

with lupus nephritis. The mRNA and protein expressions of IFN- γ were increased in PBMCs of patients with lupus nephritis, whereas IL-2 and IL-10 were decreased. Patients with lupus nephritis also had increased serum

levels of IFN- γ and reduced levels of IL-2. Patients with lupus nephritis displayed higher mRNA expression of IFN- γ , whereas patients with primary membranous nephropathy showed higher mRNA expression of IL-2.

Macrophage-derived IL-10 in renal tissues was decreased in patients with lupus nephritis. Serum level of IFN- γ was correlated with the degree of glomerulosclerosis. Apoptosis occurred in the renal tissue of

patients with lupus nephritis and could be suppressed by treatment with IFN- γ . A Th1/Th2 imbalance might play a critical role in the pathogenesis of lupus nephritis. Share story Today's pay ratio analysis from the

Economic Policy Institute shows that the average female worker
