## The Sims 3 Loverslab Free

The Aweful sims I made for the sims 3 loverslab. This is my first try, I only have one sim in the game and haven't had much time to really spend on the sims, but I really tried. This is just a preview of more work I plan on doing. This sims are more for the silent kind of player. :) 3D Version! Now you can play the game with a 3D computer! You might want to uncheck the HDF to see the original 2D look. This is the first version of the game and only supports 4 Sims (1 woman and 3 men). Enjoy! So, I finally made a version of The Sims 3 Loverslab with 9 Sims for you to play with. I also added an HDF version and renamed the HDF to HDJ. I feel this is much more fun and more intuitive. You can also add the HDJ texture for 2D even if you have the HDF. Besides, the animations are much better this way. Ive added even more animations in this version of the game, so just enjoy! I found an update for the sims 3 loverslab (1.02) and I think this is really nice. You just have to put the sims3loverslab.hdf and the sims3loverslab.pk3 inside a folder called The Sims 3 loverslab. Whats inside this folder? Well, it's the location of the game on your computer. So, just put the sims3loverslab folder in any folder of your computer. Then go to your Game folder and your Loverslab folder. If there is any update for the game, the Loverslab will be updated automatically without you having to download this update. This is a preview. I only have 1 Sim in the game. Ive spent weeks on this. :) It took me a really long time to put down how the sims 2 was created, but I hope this should be helpful. Ive just included this for those of you that would like a base for sims 3 loverslab. Im not sure if it should be a.hdf and a.pk3. Im sure there are people who would like to use this.
